DETAILED ACTION

Claims 1-51 are pending.

Election/Restrictions

Election to the following species is required under 35 U.S.C. 121:

This application contains claims directed to the following patentably distinct species of the claimed invention: a second therapeutic agent comprising at least one of (i) a second polynucleotide carried by a carrier; (ii) a protein; (iii) a non-genetic therapeutic agent, or (iv) cells.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1 and 26 are generic.

This application contains claims directed to the following patentably distinct species of the claimed invention: in first polynucleotide, second polynucleotide, or both encode one or more products selected from the group listed claims 9 and 33.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species as listed in the cited Markush group for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1 and 26 are generic.

NOTE: Applicants are required to elect a distinct product or combination of products. Furthermore, if a product is elected that is not required for treating or inhibiting restenosis in claim 24, then claim 24 would considered withdrawn to a non-elected species.

Furthermore, if claim 26 were amended to read on a non-therapeutic agent then claim 24 would be withdrawn to a non-elected species.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Claims 1 and 26 are generic to a plurality of disclosed patentably distinct species comprising a vector selected from an viral vector, plasmid vector, non-plasmid vector, or combination thereof in claim 4 and claim 28. Applicant is further required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Claims 19 and 44 are generic to a plurality of disclosed patentably distinct species comprising a stent selected from a metallic stent in claims 20 and 47; coil spring made from aliphatic polyester blends in claims 21 and 45; microporous tube made from aliphatic polyester

blends in claims 22 and 46. Applicant is further required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Because these inventions are distinct for the reasons given above and the search required for each species would be an undue burden on the examiner and the species are not co-extensive, a restriction for examination purposes as indicated is proper.

It would be unduly burdensome for the examiner to search and consider patentability of all of the presently pending claims, a restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 § 1.17(h).
